

PRESS RELEASE

Passion for Electronics at embedded world 2025

BMK as an exhibitor at the NürnbergMesse

Augsburg, February 14th 2025 – For the first time, BMK will have its own stand at this year's embedded world. The trade fair will take place from 11 - 13 March 2025 in Nuremberg.

Visitors to the trade fair are invited to visit the BMK stand 5-285 in hall 5 to find out more about the company's extensive portfolio of electronic manufacturing services. This ranges from development and fast prototyping to PCBA, assembly and after-sales services.

The BMKyourproto prototyping service offers the opportunity to test the interactive digital BMKyourproto-Portal live at the stand. The portal provides direct access to component availability, delivery times and instant quoting, thus accelerating the time-to-market of demanding electronics projects.

In the spirit of 'embedded systems', BMK will also be presenting comprehensive development services in the field of embedded hardware and software. Manufacturers of products with digital elements that are affected by the Cyber Resilience Act can find out at the stand how BMK can provide professional support in implementing the EU regulation.

BMK company profile:

BMK, headquartered in Augsburg, is a leading provider of electronic engineering and electronic manufacturing services (EMS). BMK's service portfolio covers the entire life cycle of electronic assemblies and complete devices. In addition to development, production, and end-of-life

management, BMK offers individual fulfilment / logistics services and supply chain management. 1,700 employees across seven locations in Germany, the Czech Republic, Israel and China generated a turnover of around 400 million euros in 2023.
