

PRESS RELEASE

Innovation across the board with new coating technology

BMK strengthens its coating expertise for electronic assemblies with a technology initiative

Augsburg, August 26, 2025 – With targeted investments in state-of-the-art production systems, BMK is sending a strong signal for future viability, quality, and customer focus. The newly implemented heavy-duty coating line expands the company's technical capabilities and lays the foundation for even more efficient and flexible coating processes.

Precision and flexibility in protective coating

BMK has commissioned a new heavy-duty coating line specifically designed to meet the demands of modern electronics manufacturing. The line features two coating stations equipped both with a jetting valve for precise selective coating and a curtain applicator for fast and uniform coating of large surfaces. Dual-sided coating in a single pass and an integrated oven with carrier return ensure a continuous and efficient process. The system is designed for assemblies weighing up to ten kilograms, making it ideal for protective coating of large power electronics. Thanks to rapid changeover capabilities, the line also offers high flexibility for a wide range of product variants.

Shaping the future through technology

With ongoing investments, BMK reaffirms its commitment to technological leadership and to providing all customers with tailored, future-proof solutions of the highest quality. Managing Director Dr. Bärbel Götz emphasizes: "Our new coating line enables us to respond even faster, more

precisely, and more flexibly to our customers' needs. This not only gives us a technological edge but also strengthens our position as a sustainable and reliable partner in electronics manufacturing."

BMK company profile:

BMK, headquartered in Augsburg, is a leading provider of electronic engineering and electronic manufacturing services (EMS). BMK's service portfolio covers the entire life cycle of electronic assemblies and complete devices. In addition to development, production, and end-of-life management, BMK offers individual fulfilment / logistics services and supply chain management. The company employs 1,544 people at seven locations in Germany, the Czech Republic, Israel and China.
