New website for even faster prototypes

BMKyourproto launches new website with direct link to interactive ordering portal

BMKYOUR
PROTO

Augsburg, March 25, 2026 – HANZA BMK Group GmbH, formed from the merger of the BMK Group and the Swedish company HANZA AB, is setting another milestone in European electronics manufacturing: with the new website for its prototyping service, BMKyourproto, the company is launching a digital platform that takes projects from concept to a working electronics prototype even faster, more efficiently and more securely.

BMKyourproto – The fast track to prototypes

With www.bmkyourproto.com, HANZA BMK is launching a website specifically developed to meet the demands of modern electronics manufacturing. The aim is to shorten development cycles, identify lifecycle risks at an early stage and significantly simplify collaboration between the customer and the prototype manufacturer.

The integrated BMKyourproto portal guides users through three steps to the finished prototype – from data transfer and technical clarification right through to production. It combines intuitive operation with in-depth manufacturing expertise and noticeably accelerates the development process.

- **Easy upload of all project data:** The AI-supported system automatically detects missing or unclear information and guides users through optimization and clarification processes in a structured manner.
- **Just-in-time availability check:** Immediately after uploading, customers receive feedback on component availability, environmental and lifecycle data, as well as suggestions for alternative and preferred parts. This helps to avoid bottlenecks at an early stage and ensures designs are sound from the outset.

- **Direct communication via the portal:** A dedicated contact person supports every project. All queries, approvals and documentation are handled centrally and transparently – without endless email exchanges.

Technical capabilities for demanding projects

HANZA BMK's prototype manufacturing is designed for flexibility and speed. With our own machinery, specialized teams and lean processes, we deliver customized solutions outside of standard production runs – with reduced traceability but maximum agility.

Through the merger with HANZA, two strong players are pooling their expertise. For prototype manufacturing, this means: greater capacity, greater speed and an even broader technology portfolio.

www.bmkyourproto.com is now available and is aimed at companies across all sectors that develop complex electronic solutions – from industrial automation and medical technology to IoT and automotive applications.

HANZA BMK company profile:

HANZA BMK, headquartered in Augsburg, is a leading provider of electronic engineering and electronic manufacturing services (EMS). The service portfolio covers the entire life cycle of electronic assemblies and complete devices. In addition to development, production, and end-of-life management, HANZA BMK offers individual fulfilment / logistics services and supply chain management. The company employs 1,544 people at seven locations in Germany, the Czech Republic, Israel and China. As part of the Swedish HANZA AB, Europe's largest contract manufacturer, customers now also have access to a wide range of outsourcing options in the fields of mechanics and system assembly at over 30 production sites.
